

PROJECT MANAGEMENT PLATFORM

PROJECT - ONE

PROJECT-ONE is a powerful, advanced and highly customizable end-to-end network deployment platform at the center of all operations, with a built-in full suite of project management modules you can easily and quickly obtain complete visibility of all aspects of the network deployment.

The ADMIN-ONE self-administration module included with every PROJECT-ONE package, allows your project team administrators to manage the project configuration without the need for additional development.

SELF-ADMINISTRATION

Enables administrators to create and manage projects and reports, aligning them with your business rules to deliver the most complex processes

MOBILE FEATURING

We are “Mobile Compatible” supporting offline features for creating and filling forms, surveys, completing quality audits and work orders. The PROJECT-ONE mobile app provides essential project information on the go

DOCUMENTATION MANAGEMENT

Main site details view provides access to the sites documentation management view including document uploading, revision tracking and approvals

DATA INTEGRITY

Built by industry experts who are aware of the challenges of deploying aggressive telecom turnkey network rollouts. Capabilities built in that allow for the automation of related milestones as well as mass updates. Saves time, reduces handoffs between groups and improves overall data quality
