NEXSYS-ONE
SOFTWARE SOLUTIONS

TOWER SHARING SOLUTION
TOWER - ONE

An intelligent platform that offers a tower sharing solution to centralise all site information and documentation into a single platform, including lease management, assets and subcontractor billing.

The automated billing process facilitates paying suppliers based on real-time approved work completion. TOWER-ONE works with the ADMIN-ONE module, which is an application management module helping to create, customise and manage projects directly through TOWER-ONE.

SITE INFRASTRUCTURE MANAGEMENT

Intelligent system that monitors active and passive network elements, also controlling equipment at network sites

SITE INFRASTRUCTURE MONITORING

Data from multiple sites associated are collected regularly using a combination of sensors, GPS trackers, alarms and cameras

CUSTOMER TOWER SEARCH

The customer tower search web portal allows customers to search for towers available for sharing in a desired location, check site details and space availability and submit a request for tower sharing

REPORT MANAGEMENT

The reporting portal allows users to obtain various reports including but not limited to a geographical mapping of your sites illustrations key points such as construction or upgrade projects in play, capacity availability or constraints etc. Overall, improves network visibility and information storage

PLATFORM FEATURES

- Tower sharing and tower management

- Administration portal for user management
