

## INTELLIGENT FLEET MANAGEMENT

# FLEET - ONE

FLEET-ONE provides near real-time data of vehicles. It helps fleets across multiple industries automate fleet operations, manage asset lifecycles and track drivers. FLEET-ONE brings all the features of tried

and tested fleet management systems into a convenient and easy to use application. FLEET-ONE can be used in tandem with other modules to enhance the operational efficiency of the organization.

### WORK ORDERS

---

Easily create and manage work orders and plan jobs based on severity of the incident, optimum route, time window, etc. directly in FLEET-ONE or via feeds from external systems

### NEAR REAL-TIME TRACKING

---

Interactive user-interface shows real-time vehicle locations, driver behavior and routes driven and discover valuable insights such as fuel consumption, odometer value, speed and more

### ROUTES AND TRIPS

---

Easily create routes and link to work orders for trip-based insights, route and analysis, HSE compliance, fuel consumption per trip, business vs. personal trips, etc.

### SERVICE AND MAINTENANCE

---

Keep track of vehicle health and get alerts such as service due, faults and other alarms including annual roadworthiness reminders

## PLATFORM FEATURES

- GPS tracking
- Monitors fuel level and consumption
- Powerful geofencing capabilities
- Route optimization and trip management
- Vehicle and driver allocation
- Schedule and plan recurring routes
- HSE compliance and driver behavior
- Vehicle health and security
- Insurance details
- Vehicle documents
- Accident and infringement
- Comprehensive fleet reports
- Notification and alert system
- Service and repairing
- Preventive maintenance
- Near real-time vehicle CANbus data
- Dynamic and customizable user interface and dashboards
- Alarms and notifications
- Improved driver performance
- Efficient fleet management

**Our customers' success  
is our success**
