

ALL YOUR PROJECT NEEDS

NEXSYS - ONE Pro

NEXSYS-ONE Pro supports our customers' network deployments with speed and agility, allowing for seamless integration of project, inventory and financial management.

The cloud-based platform automates forecasting and tracking, while intuitively updating to increase efficiencies across the deployment teams and their supply chains. With Pro, our customers have full access and control to easily coordinate network deployment through features that support project management, procurement, asset management, vendor compliance, colocation, field workforce management, documentation, quality control and more.

MOBILITY

We are “Mobile Compatible” supporting offline features for creating and filling forms, surveys, completing quality audits and work orders

CUSTOMIZABLE

Highly customizable end-to-end project deployment platform, with a built-in full suite of project management modules to quickly obtain complete visibility of all aspects of the network deployment

SELF-ADMINISTRATION

Enables administrators to create and manage projects and reports, aligning them with your business rules to deliver the most complex processes

REPORTING AND NOTIFICATION

Powerful reporting functionality to ensure data integrity across the platform. Your personal dashboards and notification system ensures all users know their current tasks
